

Bespoke Shed Built for Water Customer

Bespoke Shed Built for Customer

A customer came to us with a requirement for water filtration but was worried that a commercially supplied shed would not be strong enough in his very exposed location.

No problem.

Graham and Preston built a bespoke heavy duty shed that was up to anything the weather could throw at it.

If you would like any further information on the range of water filtration services, including sheds! please ring 01726

824837 and ask for Steve or Mark.
