

Wind Turbine Base Installation

Endurance 50kW Wind Turbine Base

Ground Source South West provide a complete ground works package to wind turbine installers and end users though out Devon and Cornwall.

We will provide a full service, from commissioning a site investigation to ensure the ground is suitable to assisting with the turbine installation.

Our clients include:-

[TGC Renewables](#)

[Green Thinking](#)

[Aeolus Power](#)

[Capture Energy](#)

And many private individual clients.

We have experience with installing Turbines from 7kW to 50kW Endurance Turbines.

Our clients understand that it is vital that the ground works are carried out exactly to specification and to a very high standard of finish.

We also have the capability to trench in the cable ducts and earth wires and cast foundations for meter cabinets and associated electrical installations.

Wind Turbine Base Steel
