

Fantastic Testimonial From a Groundworks Customer

We received this today from a social housing customer.

“Just a note that I visited ***** Gardens again today and was further impressed by the work which the two Aquasource groundworks engineers continue to carry out. Extremely tidy – cannot fault their work and also the rate at which they have completed the trenching. Excellent.

Customers I spoke to are very impressed including Mrs ***** at no.** who has had extensive work carried out in her garden; looks remarkably tidy and top soil yet to be added which will be better than when started! Works up by the bungalow were complete – again extremely tidy and now working on the last trench. Very professional – please pass on my remarks.”
